PERSONAL SUMMARY

Leveraging over 6 years' experience in strategy, finance, and research, I bring a disciplined, innovation-driven perspective to enterprise strategy and growth execution across financial services and high-growth businesses. I work closely with executive and Board-level stakeholders to translate market intelligence, financial analysis, and research insights into clear strategic direction and measurable outcomes. My experience spans strategy formulation, financial modelling, economic analysis, financial performance and planning, new venture and product evaluation

SKILLS

- **Strategy & Growth:** Enterprise and business strategy development; new venture and product evaluation; market entry and expansion analysis
- **Financial & Investment Analysis:** Financial modelling and valuation; investment appraisal (NPV, IRR, payback); budgeting, forecasting, and performance management
- **Research & Intelligence:** Market, sector, and competitor research; macroeconomic analysis; insight synthesis and strategy writing
- **Performance & Analytics:** Variance and cohort analysis; executive and Board-level reporting; support dashboards
- **Data & Tools:** Excel (advanced); Power BI; SQL; Python; Tableau; Metabase; Looker Studio
- **Stakeholder & Execution:** Executive and Board engagement; cross-functional coordination; strategy communication and execution tracking

WORK EXPERIENCE

Senior Strategy Associate, 03/2023 - Current Sterling Bank

- Led user research and cohort analysis across the bank and key digital products to identify retention drivers and customer drop-off points, translating insights into targeted interventions that improved customer lifetime value and recurring revenue strength.
- Developed a National Financial Inclusion Strategy adopted by Executive Management and used to engage the Presidency and key public-sector stakeholders.
- Planned and delivered half-year and full-year Executive Management and Board retreats, translating strategic priorities into actionable outcomes.
- Conducted due diligence and investment appraisals for venture investments, supporting capital deployment decisions and achieving 20% ROI on transactions valued at hundreds of thousands of dollars.
- Delivered quarterly forward-looking projections on technology spend, assets, and liabilities for Executive Management.
- Produced quarterly branch performance analysis, driving profit optimization, cost reduction, and improved staff productivity.
- Prepared monthly macroeconomic and business intelligence reports to support strategic and tactical decision-making across business units.
- Led quarterly competitor and market analysis, informing strategic repositioning and new growth opportunities.
- Conducted feasibility studies for new branch locations across multiple Nigerian states, assessing demand, cost structure, and payback timelines.
- Led the Branch Transformation initiative, focused on maximizing the economic and real estate value of existing branch assets.
- Developed 60+ business cases across capital and operational expenditures, including detailed financial validation notes, supporting the Head of Strategy and improving strategic resource allocation by approximately 20%.

- Delivered 50+ investment teasers, strategy papers, and investment memoranda, supporting strong investor engagement and the successful mobilization of investment capital.
- Leveraged financial modelling and industry research to assess target companies' business models, competitive positioning, and macroeconomic exposures influencing performance and valuation.

Finance & Business Intelligence Analyst, 10/2020 - 03/2023

Gokada Rides Ltd

- Prepared monthly management reports covering financial performance, operational KPIs, and key business trends for senior management and investors.
- Built unit economics, revenue, and cost models to support financial planning, pricing decisions, and route-level profitability analysis.
- Developed and maintained executive dashboards tracking revenue, margins, utilization, and operational efficiency across service lines.
- Conducted budget tracking and variance analysis, identifying cost drivers, inefficiencies, and margin improvement opportunities in a high-volume logistics environment.
- Performed profitability and pricing analysis to support market expansion and service optimization initiatives.
- Applied data analysis and predictive techniques to demand and revenue data to support operational planning and performance improvement.
- Automated recurring reports and data workflows using SQL and BI tools, improving data accuracy, reporting speed, and management visibility.

Additional Projects & Advisory

- **Tax Padi (2025):** Developed end-to-end financial models and projections for an AI-powered tax filing and compliance platform, including revenue assumptions, cost structures, cash flow forecasts, and scenario analysis. Prepared investor-ready financial dashboards and pitch materials to support fundraising and go-to-market planning.
- **DigiVant (2024):** Built detailed financial and unit economics models for a digital microfinance bank, covering savings, lending, payments, and transfers. Conducted profitability, growth, and sensitivity analysis to support investor discussions and capital-raising activities.
- **Energy Sector Research & Advisory (Ongoing):** Conducted financial and market analysis on oil and gas companies, assessing cash flow resilience, cost structures, price sensitivity, and risk-return profiles. Provided data-driven insights to support risk assessment, portfolio allocation decisions, and sector exposure monitoring.
